

NHUT NGUYEN (KANG)

SENIOR FULL STACK DEVELOPER · SYSTEM INTEGRATION SPECIALIST

📞 0778938041 ✉ nhutnguyen.tech.2612@gmail.com [in] linkedin.com/in/nhut-developer 🌐 nhutnm.id.vn

SUMMARY

Full Stack Developer with 8+ years of experience building and scaling web, mobile, and backend systems, including mission-critical banking integrations. Proven track record leading cross-functional teams of 3–15 through the full delivery cycle — requirements analysis, architecture, CI/CD, and code review — across React/Vue frontends and Laravel/Node.js/Spring Boot backends. Known for solving hard integration problems across legacy and modern systems rather than specializing in a single stack.

Goal: *Transition into a Technical Lead role — owning architecture decisions, mentoring developers, and shipping high-impact products — while continuing to deepen hands-on technical depth.*

TECHNICAL SKILLS

Languages	JavaScript/TypeScript, PHP, Python, Java, Objective-C, HTML5, CSS3
Frontend	React, Vue.js, Next.js, Redux, React Native
Backend	Laravel, CodeIgniter, Yii2, Express.js, Django, Spring Boot
Cloud & DevOps	AWS, GCP, Docker, GitHub Actions, CircleCI, Vercel
Databases	MySQL, PostgreSQL, MongoDB, DB2, MSSQL, Oracle
Testing	Jest, PHPUnit, Selenium, Cypress, API Testing
Tools & Design	Git (GitHub/GitLab/Bitbucket/SVN), Jira, Notion, Figma, Photoshop
Banking Domain	Card Issuing & Personalization (CPV/CNS); Omnicard core operations & upgrades (Omnicard v7, OmniWS, API 360); Portal Card / E-Portal Card; T24 core-banking sync; monolith-to-microservices migration; coordination with card networks, partner vendors (MKGroup, FIME), and the State Bank on regulatory changes

PROFESSIONAL EXPERIENCE

- System Integration Specialist | Sacombank

Jul 2024 – Present

Omnicard / Omnicard v7 / OmniWS / Issuing Card (Java Spring Boot) · CPV/CNS · Portal Card / E-Portal Card (.NET) · Epay Services

 - Analyze and deliver changes to the Omnicard core system driven by business, card-organization, or State Bank requirements, coordinating directly with partner units to keep releases compliant and on schedule.
 - Contributed to the Omnicard v7 core upgrade, developing OmniWebservices input APIs under the API 360 initiative to strengthen integration consistency across downstream services.
 - Own end-to-end implementation of the CPV/CNS (card personalization verification) process, coordinating with external partners MKGroup and FIME to streamline card-issuance turnaround.
 - Design and build report-export and job-scheduler systems on the Portal Card platform, serving business, corporate, and individual banking users.
 - Lead migration of services from C# to Java as part of a monolith-to-microservices transition; implement real-time data synchronization between T24 and Omnicard.
- Team Lead / DevOps | Salto Vietnam

May 2020 – Jul 2024

Led full-stack teams of 3–15 across international client projects, owning CI/CD, requirement analysis, and delivery end-to-end.

 - Leap-it** (Team Lead/DevOps, team of 5) — restaurant & HR management web app; owned CI/CD and full environment setup. Stack: React, Next.js, AWS, Laravel, Django, PostgreSQL.

- **Justfine** (Frontend Team Lead/DevOps, team of 6) — job-matching platform syncing data from partner systems; owned design docs, QA, and CI/CD pipeline. Stack: AWS, React/Redux, Laravel, Docker.
- **Flagman** (Team Lead, cross-border team of 15 — VN/PH/JP) — built a draw.io-style diagramming tool. Stack: React, Redux, Jest, Laravel, Socket.IO.
- **GS-System** (Full Stack Developer, team of 10) — map-based data platform spanning Web, iOS, and React Native; set up the Docker base, built key modules, led cross-code reviews.
- **Additional engagements** — roles spanning Team Lead, Full Stack Developer, and iOS Developer across PHP/Laravel, Python/Django, React/Redux, Objective-C, and Selenium automation:
 - **SelfPro** — member ranking/evaluation system.
 - **Yuushi Seiko** — money-lending application.
 - **Everbank Integration** — synced purchase/sale data between Salesforce, Kintone, and cloud storage.
 - **CallForce AutoBot** — automation tool bypassing CAPTCHA for predefined workflows.
 - **iOS Taiyou** — app for uploading construction-site photos/videos to the cloud.
 - **Smart Shukatsu** — recruitment platform matching employers and graduating students.
 - **Bebit** — Vue.js module development with unit testing.

Full Stack Developer / Business Analyst | *Pascalasia Vietnam (Onsite)*

Aug 2020 – Jun 2021

Project: Phantom-3D — virtual seller chat platform with live video-streaming integration

- Analyzed client requirements and designed the project roadmap (BDD/DDD); broke work into phases and assigned tasks across a team of 5.
- Implemented core modules, led end-to-end product testing, and built the CI/CD pipeline with GitHub Actions. Stack: React, Redux, Node.js/Express, AWS S3, AWS Kinesis Video Stream.

Web / PHP Developer | *Sharing Innovation*

Jul 2018 – May 2020

- **HameeMF** — e-commerce platform for warehousing & trading; implementation, cross-code review, PHPUnit testing. Stack: PHP (Zend/FuelPHP), React, Elasticsearch.
- **ANA VELTRA** — travel services application; implementation and testing (PHP/Laravel 5.7, jQuery), plus supporting Spring Boot modules for a third-party integration.

EDUCATION

B.S. Information Technology — Saigon Technology University (2013 – 2017)

- 3rd Prize, “I’m Coder” contest, STU 2016

SIDE PROJECTS & RECOGNITION

- **khomanguon.org** — community site sharing game/web/app source code and server setup guides (1-click VM builds, GM tools) for the Vietnamese dev community.
- **Self JP App** — cross-platform Japanese self-study app (kana, N5–N1 kanji, Minna no Nihongo vocab/grammar, listening drills), Vietnamese-language UI. Built with Tauri + React/TypeScript, with iOS/Android build targets.
- **Cost Of Trips (Chi Phí Chuyển Đi)** — native Android app for tracking trip expenses by category with local export; no account, ads, or network access required. Kotlin + Jetpack Compose.
- **CozyPomo — Focus App (Gaming Style)** — gamified Pomodoro timer on Google Play: focus sessions hatch and grow collectible creatures in a personal “forest,” with account sync and an admin console for content management. Native Android (Kotlin/Jetpack Compose) + NestJS/PostgreSQL backend.
- **AWS Kinesis Video Stream for React** — open-source SDK wrapper for the AWS Kinesis Video Stream JS SDK.

OUTSIDE SKILLS — SOFTWARE TESTING

- Hands-on experience across **Regression, Smoke, Localization, Load, Automation, Payment, and Functional Testing** on the uTest / TesterWork platforms.

- **Favorite Tester** status with 6 major clients (Airbnb, Digital Guardian, Monday.com, Moon Active, Lightricks, Novo Nordisk); **Dedicated Tester** for 10 clients/enterprises, including Expensify, Slack, and TravelDuck.
- Promoted to **Test Team Lead** at uTest, effective early 2026.

Hobbies: *Travel, swimming, lofi music, and continuous learning through courses and webinars.*
